

DB2 for z/OS Master Class

Are you finding it difficult getting approval to attend your favourite DB2 educational conference or user group this year? Don't worry; **BMC Software and SYNTAX** is holding a Free Technical Seminar.

Explore with us how you can optimise the performance of your SQL and DB2 applications. Come and hear internationally recognised industry expert Susan Lawson address the complex matter of SQL Performance, involving real-life experiences of SQL tuning from customers around the world.

Concerned about DB2 Performance?
What More can you achieve from tuning DB2?
What help can you expect from DB2 9 and 10?

In a short technology-packed day, we will update you not only on today's challenges, but give you an insight into the solutions that address them.
